Stuffy Pal Picnic: This is an in school event for teachers, children and their favorite stuffed animal. Once again, we are promoting our healthy eating habits in a fun way. The classroom will be converted into a picnic area for afternoon snack where children and teachers can bring their favorite stuffed friend.

Rainbow Week:

-  First Day of SPRING: Wear a Rainbow – We encourage teachers and children to wear a rainbow to welcome Spring and kickoff our rainbow week.
-  Rainbow Science – Teachers will plan fun rainbow science activities that are age appropriate to their class. Our scientific brains will say...”I wonder. What if? Let’s try!”
-  Exploring Prisms – Teachers will introduce new materials, like prisms and kaleidoscopes, to the science learning center where children can explore bending light.
-  Rainbow Process Art - Teachers will plan open-ended art experiences for children to create with the colors of the rainbow.
-  Eating a Rainbow – Our culinary specialist, Stacy, will provide bright colored fruits and vegetable for us to eat all week long.
